Welcome to your Connected PC

Hi there, and welcome! This little guide covers the basics of your new computer. Keep it in My Documents and open it whenever you like.

The Start button (bottom left) opens every program and your folders. Click a taskbar button to switch windows; click it again to minimize. Drag a window by its title bar. Drag its edges or corner to resize it. Double-click the title bar to maximize, or use the buttons on the right.

The clock in the corner shows the computer’s date. Click it to see the calendar, or change the date in Settings > Date and Time.

Getting online

Open the Web Browser from the desktop or the Start menu.
Type an address (like metube.com) or anything you want to search for.

Handy shortcuts:

Ctrl+T	new tab	Ctrl+W	close tab
Ctrl+L	address bar	Ctrl+D	bookmark this page
Ctrl+H	history	Ctrl+J	downloads
F5	reload	Alt+Left / Alt+Right	back / forward

Downloads are saved to your Downloads folder. Pictures can be set as your desktop background straight from Photo Viewer.

Staying in touch

Messenger keeps you chatting with friends. Set your status to Online, Away or Busy, and paste any web link to share it.

Mail is your inbox. Write, reply, forward and attach files from your computer. Drafts are saved automatically.

Everything you make is saved on this computer, so it will all still be here after you restart. Have fun!
